SUMMARY

I'm a Frontend Engineer with experience in building responsive and interactive web interfaces using React, TypeScript, and Next.js. I'm used to working in a team using Git, and I've had the opportunity to mentor interns and serve as a temporary team leader. I'm also skilled at turning designs into fully functional user interfaces using Tailwind CSS and MUI.

WORK EXPERIENCE

Frontend Developer, BTW Edutech   **Aug 2022 - Present**

- Developed responsive web-based educational platform interfaces using React and Next.js.
- Translated designs from Figma into fully responsive layouts using Tailwind CSS.
- Integrated APIs using Axios and React Query.
- Collaborated with the development team using Git and GitHub.
- Acted as a mentor for interns and served as temporary team leader in several frontend projects.

Backend Developer (Probation), BTW Edutech   **May 2022 - Jul 2022**

- Learned and implemented backend APIs using Golang.
- Built several internal endpoints for in-house tools.
- Gained understanding of REST API structure and communication flow between frontend and backend.
- This experience enhanced debugging and integration skills from a frontend perspective.

EDUCATION

Information Management (D3)   **Aug 2018 - Oct 2021**
State Polytechnic of Bali

- Specialization: Informatics Management, Information Systems, Software Development, Information Technology, and Multimedia.
